

# PhoneLine+

Moving your small business  
phone system to the cloud

## Introducing PhoneLine+

PhoneLine+ is THE telephony solution for the future. Its beauty is in its simplicity - smart, digital telecoms technology, delivering a straightforward cloud-based solution for business. Using voice over internet (VoIP) technology to deliver calls over the broadband network, it has been expertly designed to replace traditional landline services and is the perfect business phone system for small businesses.

## Why PhoneLine+?

Now is the time to upgrade! The PSTN (public service telephone network) is soon be resigned to the history books and upgraded to a fully-digital network.

The PSTN is being turned off, so in order to keep your business phone system and existing telephone numbers operational, you'll need to move to the new network where calls are being delivered using VoIP technology. If you already have a broadband

service then it's likely that it will be able to support PhoneLine+ and the switch will be easy.

So, it's time to make sure your business is prepared with an all-IP solution. But fear not, it's an exciting time and the benefits are huge! PhoneLine+ has been expertly designed to replace traditional landline services and is jam-packed with features, all at a brilliantly competitive price.

## How does PhoneLine+ work?

PhoneLine+ takes your traditional 01 and 02 telephone numbers and places them in the cloud. This removes the connection to the legacy copper-based PSTN network and uses digital VoIP technology to deliver calls over a broadband network. It's fast, reliable, cost-effective and future-proof.

## Why choose Online Systems?

- Cost-effective services that won't break the bank
- Dedicated account management, support, and service expertise
- Bespoke packages, designed to keep your business secure and connected
- Seamless installations and maintenance
- Future proof systems that are resilient and flexible solutions that will grow with your business

## Benefits of PhoneLine+

- ✓ **Cloud-based** - ensuring your business is ready for an all IP-future, ahead of the PSTN switch-off
- ✓ **Reliable** - using resilient fibre-based broadband technology
- ✓ **Customer experience** - divert calls to a colleague, set bespoke messages or redirect customers to a mobile device to ensure you're always available
- ✓ **Keep your numbers** - stay connected with your existing business numbers
- ✓ **Feature-rich** - all the key call management features you'll ever need
- ✓ **Easy-to-use** - designed with an intuitive, web-based interface
- ✓ **No more running** - access calls using any device, from anywhere. You'll never miss a call again!
